Hoist Rings - Swivel Eyebolt - Tamper Resistant

Material
316 Stainless Steel

Performance
The Side Pull Style Hoist Ring is ideal for flipping fixtures, dies and moulds.
The hoist ring is low profile and has a unique ball retention design. The oversized forged ball easily adapts to larger hoist hooks. Its relatively light weight makes it easier to handle than smaller hoist rings and the installation is conveniently done with external wrenching (47561, 47562) or internal/external wrenching (all other sizes).
• Can be used for top lifts
• Full service and production.
• Rated at 5:1 strength factor.
• All products are CE marked.
• Proof tested to 200% of rated load capacity.

316 Stainless Steel.
