Suspension Units - Rubber - Square - Insert Type

Plug-in Connection: An easy and cost-effective connecting variant, if the unit is pretensioned in only one direction. Alternating oscillations in both directions would cause noise due to play compensation.

*Inserted Connection: The connection square has to be of blank quality with tolerance from h9 to h11. According to the specific connection square the edges might have to be machined.

**Outer Square Connection: The tolerance of the outer housing corresponds to commercial square tubes. The thickness of the additional protection part of 40 to 80µm has to be considered.

Housing: Steel / Rubber: Black, hardness 70 Shore.

Inner square section: Steel tube for mounting plug-in lever arms on one or both sides.

All metal parts are paint-finished.

Maximum Working Angle: $\pm 30^\circ$.

Operating Temperature Range: -40°C to $+80^\circ\text{C}$.
