INFORMATION

For installation of industrial machinery where the ratio of shear loads to vertical loads is less than or equal to 1 to 5.

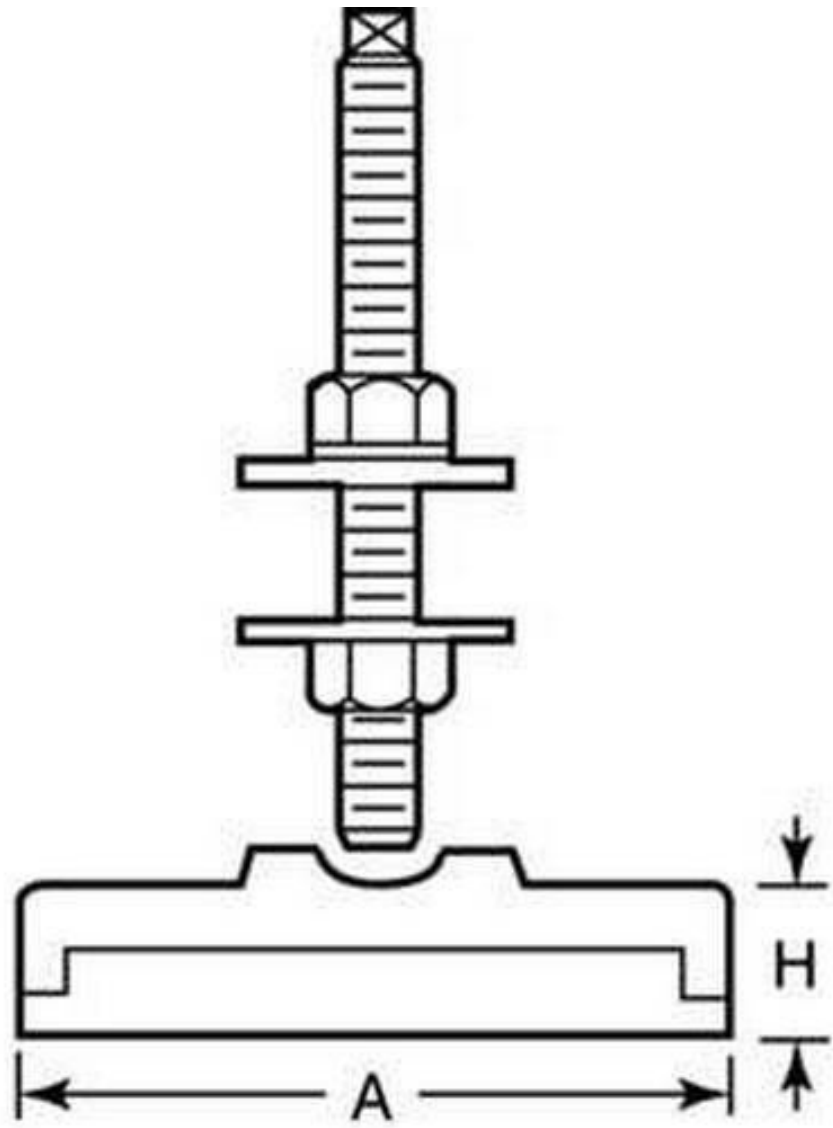

Base is unthreaded. The stud rests on the pad and is not threaded in or fastened to the pad.

Self aligning feature compensates for uneven floors without sacrificing stability.

Scientifically designed diamond suction cells of the neoprene insert firmly anchor the machine to the floor.

Recommended for a wide range of industrial machinery and equipment where simple precise leveling is required.

25.4mm level adjustment.
